

iDigi™ Developer Program

Resources for Rapid M2M Solution Creation

End-to-end process for developing, testing and distributing M2M applications using the iDigi platform.

Overview

The iDigi Developer Program provides an end-to-end process for developing, testing and distributing your Machine-to-Machine (M2M) application using the iDigi platform and supporting components. The program includes the development resources you will need to build robust M2M-enabled applications, including a real-time, online sandbox for integrating and testing iDigi platform services.

Components of the iDigi Developer Program include:

- Education
- Online Development and Testing Environment
- Support Forums
- Developer Community Wiki
- Example Source Code Library

The iDigi Developer Program dramatically accelerates time to market, whether you are exploring your first M2M application or have been building solutions for years. The availability of M2M-focused information, examples and community is unparalleled.

Getting started is easy—and free! Visit www.idigi.com to learn more and to register online, or contact us at 1-877-IDIGI-EZ or 1-952-912-3444 for additional information.

Program Highlights

Features/Benefits

- **Education** – Getting started guides and self-paced training classes introduce you to iDigi's software and service components.
- **Support** – Use Digi's online support forums to interact with Digi's world-class technical support and engineering organizations.
- **Community** – Digi's Developer Wikis are the ideal place to learn and share.
- **Robust Example Code** – Explore ready-to-use application examples.
- **Open** – Use iDigi's software as is, or extend to suit your environment.
- **Free** – Use up to five development gateways on our development and test platform. Build, test and evaluate your solutions with no fees and no infrastructure requirements.

Education

The iDigi Developer Program offers a self-paced curriculum with additional supporting guides. Training starts with the basics and encourages interaction via a PC to validate your understanding. Courses and guides include:

- iDigi Platform Quick Start
- Getting Started with iDigi.com
- iDigi Platform Web Services Tutorial:
From Asset to Application in Minutes
- iDigi Dia101: Basics of the Digi Device Integration
Application (a software component for quick device integration)
- iDigi Dia102: Running iDigi Dia on Your Digi Product
- iDigi Dia103: iDigi Dia Presentations and Transforms

Additional courses cover more advanced topics and are directed to those looking to extend the already powerful iDigi Dia capabilities with extensions unique to their company or industry.

Support

Digi's technical support team is available to ensure that M2M solution builders get the answers they need. Developers can post questions to Digi's technical support and engineers via the online support forum.

Community

Digi's online communities are places to explore and keep up to date on what others are doing in the M2M world. The iDigi online community uses the power of the Wiki to enable your discovery. With new information posted nearly every day, you are sure to learn something new or explore a new approach.

Robust Source Code Examples

Nothing beats a great example, and Digi provides plenty. Digi's examples are generally not snippets—they are fully functioning, ready-to-use applications. Because they are open, you can view the source code, saving time in bringing your product to market. We even provide an online sandbox environment where you can experience the full power of the iDigi platform—free for up to five gateways. Just sign up to register and use the iDigi platform for as long as you need.

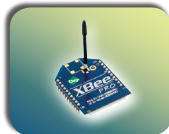

Get Started Today

Getting started and using the iDigi Developer Program is easy—and free! Sign up at www.idigi.com where you can download the software and gain immediate access to training courses, support and community resources.
